Spacious 5 Bedroom Home Located In A Tranquil Community

This delightful home is ideal for a family wanting a lot of living space, in a single family house with its own yard but not too much yard maintenance. Located in a low traffic neighborhood having only one street in and out, it is within walking distance of numerous shops, cafes, and other attractions.

The modern kitchen, with a large pantry, is separated from the family room by an island and has a breakfast area at one end. A sliding glass door leads from the breakfast area to the back patio. The adjacent family room is light filled from a large window. The kitchen, breakfast area, and family area form an inviting great room.

The living room and formal dining area are located at the front of the house and separated from the private areas by the staircase.

One bedroom is off of a short hall and adjacent to the family room. It would be an ideal guest room. The other four bedrooms are upstairs as is the laundry room and two bathrooms. The primary bedroom, with bath en-suite, has a walk-in closet, dual sinks, a tub, and a shower.
